

Super Store Sales Dashboard

Power BI Project Report

This report documents an interactive Super Store Sales Dashboard created in Microsoft Power BI Desktop. The dashboard analyzes sales, profit, quantity, customer segments, payment modes, shipping modes, categories, sub-categories, regional performance, monthly year-over-year trends, and a 15-day sales forecasting view.

1. Dataset Overview

The supplied dataset contains 5,901 records and 23 columns, covering orders from 01 Jan 2019 to 31 Dec 2020. Key fields include Order Date, Ship Date, Ship Mode, Customer, Segment, State, Region, Category, Sub-Category, Sales, Quantity, Profit, Returns and Payment Mode.

2. Key KPIs

Metric	Value
Total Sales	\$1,565,804.32
Total Profit	\$175,262.11
Total Quantity	22,317
Number of Records	5,901

3. Dashboard Analysis

The main dashboard presents KPI cards and interactive visuals for category, sub-category, ship mode, segment, payment mode, monthly sales/profit YoY, and state-level sales and profit. Region selectors allow the analysis to be viewed for Central, East, South and West.

4. Sales Forecasting

The second Power BI page provides a 15-day sales forecasting view. It shows historical sales over time and a forecast extending into January 2021. The source material identifies this page as 'Sales Forecasting - 15 Days'; the underlying forecasting algorithm is not specified in the supplied report.

Super Sales Forecasting - 15 Days Forecasting

5. Key Business Insights

- Office Supplies is the leading category by sales (\$643,707.69).
- Phones is the leading sub-category by sales (\$196,563.55).
- West is the leading region by sales (\$522,441.05).
- Consumer is the largest customer segment by record share.
- Standard Class is the most frequently used shipping mode.
- Monthly Sales YoY and Monthly Profit YoY visuals support comparison across 2019 and 2020.

6. Skills Demonstrated

Power BI dashboard design; business intelligence reporting; KPI analysis; interactive filtering; category and regional analysis; time-series/year-over-year analysis; and sales forecasting visualization.

7. GitHub Publishing Checklist

Upload the README, PBIX file, permitted dataset, PDF report, and dashboard screenshots. Before publishing, verify that the dataset contains no confidential, personal, client-owned, or restricted information.
